

The *Quebec Academy of Biocompatible Dentistry (ADBQ)* presents

Christopher Shade, Ph.D. of *Quicksilver Scientific (Colorado)*

Mercury Intoxication: Understanding analytical approaches, diagnostic tools and detoxification strategies

Friday, September 23rd, 2011 – 08:30 AM to 4 :30 PM – (Lunch included)

Westin Montreal Hotel, 270 St. Antoine West • Montreal, Quebec H2Y 0A3

Tel: 514-380-3333 • Reservations: 1-866-837-4262 – Near Old Montreal attractions

A unique opportunity for physicians, naturopaths, dentists and their staff to learn about mercury intoxication from exposure to amalgams and modern treatment protocols.

- Differentiate the major forms of mercury that humans are exposed to and understand their differences
- Understand the three Phases of Detoxification
- Understand the Glutathione System and its central importance to health and detoxification
- Understand how intestinal health can control detoxification and how to intestinal elimination instead of urinary elimination for metal detox
- Learn how to use Quicksilver Therapeutic Detoxification System to restore detoxification system, including IMD Intestinal Cleanse, Clear Way Cofactors, and our *Thersasomal* phospholipid encapsulation nutrient delivery system.
- Understand how mercury speciation analysis and compartment ratio analysis expands diagnostic utility of *non-challenged* mercury measurements and why challenge tests are not necessary for mercury
- Become familiar with auxiliary diagnostic measurements (e.g. porphyrins, glutathione, MELISA) that reveal stressors to the organism.
-
